

# Alternate Housing Numbers

† Sometimes housings are used to make more than one type (i.e. duty level) of mounted bearing unit. For instance, a medium-duty housing (i.e. PX 00 series) might be used to create a normal-duty (i.e. P 200 series) unit.

For example, if you order a UCP 213 pillow block, you may receive a P213 Housing or a PX12 housing. These two housings are dimensionally identical.

The table below shows the catalog number (minus the shaft designation) and the two possible housing numbers.
